DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Pericard et al. (6,039,306).

Pericard discloses an aerosol valve (10, see figure 1) with a valve stem (12), and an aerosol container (col. 3:45-47). The claims are replete with non-structural intended use language (for use in a cryosurgical device). This language has no patentable weight. The prior art structurally anticipates the claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Burt (6,318,603).
